3	Angular JS; client Side MVC, Bootstrap, Kendo UI, Knockout JS, JQuery, DOM, SOAP, JSON, XML, CSS,	32
4	Postgress , MySql and Oracle	32
5	Jasper reports	9
6	Node JS using Express with React js and Graphql	8

WITH CONTINUOUS SUPPORT & MAINTENANCE

OPERATING ODCs FOR 15+ YEARS

Offshore Development Center (ODCs) advantage

Well defined roles & responsibilities within the ODC team

Governance through an agreed communication, meeting and reporting plan

Transition management at the start of engagement and knowledge transfer

Methodology and processes to adopt

Commercial Management

Team performance, training and development

Case study

- **Chemwatch (Australia)** provides web-applications on a SaaS model to clients globally primarily for the Environment, Health & Safety vertical
- The applications range from authoring of **Safety Data Sheets (SDS)**, searching, storing and managing of the SDSs, Control Band regulatory requirements, Risk audit, Emergency response, etc. The SDSs as well as the UI can be accessed in 47 languages.
- The **ODC** was set up in 2002 with a small team headed by a Project leader developing one application. The setup became larger with simultaneous development / enhancement / support for multiple applications each having their dedicated team. At present the ODC has more than 30 developers who supports the applications developed with modifications / enhancements as and when required
